

HCN/Wave JobNimbus Ops Implementation Pack

Purpose

This pack documents the operational logic needed to review HCN/Wave homeowner insurance claim files in JobNimbus, determine the correct Thresher status, prepare claim filing packets, create dry-run updates, and request approval before making any live updates.

The operating principle is simple:

Use fresh file data, identify the real bottleneck, propose one primary next action, and never write, send, update, create, delete, or modify anything until the user approves the exact action.

1. Core Operating Rules

Default Scope

The default working scope is Chance Pearson's assigned Home Claim Network / Wave Public Adjusting files in JobNimbus.

Do not touch Jobrolo unless the user explicitly changes scope.

Fresh Data First

Before giving file advice, review current JobNimbus data. Do not rely on memory or old chat context.

For any file review, inspect:

- JobNimbus number
- Homeowner/client name
- Property address
- Phone and email
- Current JobNimbus/Thresher status
- Carrier
- Policy number
- Claim number
- Date of loss
- Type/cause of loss
- Adjuster name, phone, and email
- Recent activity and notes
- Open tasks
- Documents

- Calendar events or appointments
- Missing information
- Current bottleneck
- Best next action

One Primary Next Action

Each file should have one clear operational next move.

Do not let stale-task cleanup distract from the main action needed to move the claim forward.

Approval First

Dry-run means proposed only.

Do not execute any of the following without exact approval:

- JobNimbus field updates
- JobNimbus notes
- JobNimbus tasks
- Calendar events
- Gmail drafts
- Sent emails
- Quo texts
- Mitra/Replit claim filing packets
- Status changes
- Contact updates

When approval is needed, present an execution approval queue.

2. File Review Workflow

Step 1: Locate the File

Search using any of these identifiers:

- Homeowner name
- JobNimbus number
- Claim number
- Policy number
- Property address
- Phone number
- Email address
- Carrier

- Adjuster name or contact info

Step 2: Review JobNimbus File

Review all available current file information:

- File details
- Workflow/status
- Claim fields
- Owner
- Recent notes
- Recent activity
- Open tasks
- Documents
- Calendar entries
- Appointments
- Missing info
- Conflicts between notes, tasks, documents, and fields

Step 3: Review Documents When They Matter

Use document review for:

- Policies
- Declarations pages
- TDI forms
- Estimates
- Carrier letters
- Appraisal documents
- Appraisal demands
- Scope documents
- Award documents
- Scanned forms
- Image-based PDFs when OCR is needed

Document review is especially important before:

- Filing a claim
- Moving to appraisal
- Sending an appraisal demand
- Confirming coverage
- Confirming policy number
- Confirming date of loss
- Confirming carrier position
- Comparing estimate gaps

Step 4: Identify the Bottleneck

The bottleneck is the reason the file is not moving forward.

Examples:

- Missing policy or declarations page
- Claim not filed
- Claim filed but no claim number
- Carrier receipt not confirmed
- No desk/field adjuster info
- Inspection not scheduled
- Inspection completed but no estimate/payment
- Negotiation stalled
- Appraisal demand not sent
- Carrier appraiser not assigned
- Umpire issue unresolved
- Payment or award needs tracking
- File is ready for close review

Step 5: Recommend One Next Action

The next action should be specific and executable.

Examples:

- Prepare Mitra claim filing packet
- Call carrier to confirm receipt and claim number
- Email adjuster for inspection status
- Create calendar event for inspection
- Draft appraisal demand follow-up
- Request carrier appraiser assignment
- Update JobNimbus status after approval
- Create a follow-up task after approval

3. Thresher Status Logic

Photo File / Estimate Needed

Use when photos, documents, or estimate preparation need review or completion.

Typical next actions:

- Review photos/documents

- Confirm damage categories
- Complete estimate
- Move to PA review after estimate/docs are ready

Ready for PA Review

Use when the PA or IPA needs to review the estimate, policy information, coverage, and next move.

Typical next actions:

- Review estimate
- Review policy/declarations page
- Check claim status
- Decide whether to file, negotiate, supplement, or prepare appraisal

Claim Filing / Intake

Use when the claim needs to be filed or the filing status is unclear.

Typical next actions:

- Locate policy/declarations page if available
- Prepare claim filing packet
- Confirm authority documents if needed
- Send packet to Mitra/Replit after approval
- Do not stall automatically if carrier can locate coverage by insured/address/phone/policy

Submitted Awaiting Confirmation

Use when the claim has been filed but receipt, claim number, adjuster assignment, or inspection status needs confirmation.

Typical next actions:

- Confirm carrier received claim
- Obtain claim number
- Obtain desk adjuster info
- Obtain field adjuster info
- Confirm inspection scheduling
- Set follow-up task after approval

Negotiating / Hot-Final Negotiation

Use when inspection, scope, payment, or supplement negotiation is active.

Typical next actions:

- Follow up with carrier/adjuster
- Compare HCN/Wave estimate to carrier estimate
- Track payment status
- Request revised scope/payment
- Escalate if carrier is nonresponsive

Ready for Appraisal

Use when appraisal appears to be the next move but the file needs final verification before demand.

Typical next actions:

- Verify estimate gap
- Review policy appraisal clause
- Confirm relevant estimates and carrier documents
- Prepare appraisal demand
- Prepare package for approval

Submitted for Appraisal

Use when appraisal demand has been sent and HCN/Wave is waiting for carrier response.

Typical next actions:

- Confirm demand receipt
- Request carrier appraiser assignment
- Track deadlines
- Follow up with carrier or adjuster

Carrier Appraiser Assigned / Meeting Scheduled

Use when the carrier appraiser is assigned or an appraisal/inspection meeting is scheduled.

Typical next actions:

- Capture appraiser contact info
- Confirm meeting date/time/location
- Confirm homeowner access if needed
- Create or update JobNimbus calendar event after approval

Initial Approval / Umpire / Finalized / Review for Close

Use when the file is in award, umpire, payment, final documentation, or closeout tracking.

Typical next actions:

- Track award
 - Track ACV/RCV
 - Track payment
 - Confirm remaining documents
 - Confirm homeowner/client issues
 - Prepare file for close review
-

4. Next-Action Priority Rules

1. Missing Policy or Declarations Page

First, look in JobNimbus documents.

Request from homeowner only if needed.

Do not automatically stall claim filing if the carrier can locate coverage by insured name, property address, phone, or policy number.

2. Claim Not Filed

Prepare a Mitra/Replit claim filing packet.

3. Claim Filed

Update claim number, status, and adjuster information after approval.

Confirm carrier receipt.

Set a follow-up task after approval.

4. Inspection or Reinspection Pending

Confirm homeowner access and adjuster details.

Create or update JobNimbus calendar event after approval.

5. Appraisal Ready or Submitted

Verify documents.

Send demand/package if approved.

Follow up for carrier appraiser assignment.

6. Carrier or Payment Waiting

Follow up with carrier or adjuster.

Track payment, estimate, scope, or correspondence.

7. Client Stale

Homeowner updates should usually go through Andrea/client coordinator.

Do not over-message homeowners.

8. Internal Stale Task

Work, close, update, or reassign the task.

Avoid duplicate busywork.

5. Claim Filing Packet Template

Required Packet Fields

- Insured name
- Property address
- Homeowner phone
- Homeowner email
- Carrier
- Policy number, if known
- Date of loss
- Cause of loss
- Practical damages
- Signed PA/LOR authority, if needed
- Relevant notes/documents

Damage Categories

Use practical damage categories only when supported by documents or file facts:

- Roof

- Exterior/elevations
- Windows/screens
- Fence
- AC
- Detached structures
- Interior water
- Personal property

Do not list generic roof components unless the file documents support them.

Claim Filing Packet Format

Client: Property: Phone: Email: Carrier: Policy #: Date of Loss: Cause: Known Damages: Authority Docs: Relevant Documents: Notes for Filing: Missing Info: Recommended Action:

6. Dry-Run Update Format

Every proposed action should be shown before execution.

JobNimbus Status Dry Run

Proposed JobNimbus status update:

File: Current Status: New Status: Reason: Evidence: Approval Needed: Execute only after approval.

JobNimbus Note Dry Run

Proposed internal note:

File: Note Text: Reason: Do Not Include: Approval Needed: Execute only after approval.

JobNimbus Task Dry Run

Proposed task:

File: Task Title: Task Details: Due Date: Assigned To: Reason: Approval Needed: Execute only after approval.

Calendar Event Dry Run

Proposed calendar event:

File: Event Title: Date/Time: Location: Attendees/Contacts: Description: Reason: Approval Needed: Execute only after approval.

Gmail Draft Dry Run

Proposed Gmail draft:

To: CC: Subject: Body: Thread: Reason: Approval Needed: Draft only after approval.

For insurance emails, use the claim number only as the subject when applicable.

7. Approval Queue Template

When the user asks what needs approval, provide this format:

Execution Approval Queue

1. JobNimbus Status Update

2. File:

3. Change:

4. Reason:

5. Approval needed:

6. JobNimbus Field Update

7. File:

8. Field:

9. Current value:

10. Proposed value:

11. Reason:

12. Approval needed:

13. JobNimbus Note

14. File:

15. Proposed note:

16. Reason:

17. Approval needed:

18. Task

- 19. File:
 - 20. Task:
 - 21. Due:
 - 22. Reason:
 - 23. Approval needed:
 - 24. Calendar Event
 - 25. File:
 - 26. Event:
 - 27. Date/time:
 - 28. Reason:
 - 29. Approval needed:
 - 30. Gmail Draft or Email
 - 31. File:
 - 32. Recipient:
 - 33. Subject:
 - 34. Purpose:
 - 35. Approval needed:
 - 36. Mitra/Replit Packet
 - 37. File:
 - 38. Packet purpose:
 - 39. Missing info:
 - 40. Approval needed:
-

8. Communication Rules

General

Be direct, specific, and operational.

JobNimbus Notes

Do not log text-message content in JobNimbus unless explicitly requested.

Do not put reported damages in routine JobNimbus notes.

Do not add claim-filing rep names to JobNimbus notes.

Insurance Emails

Use Chance as sender/persona unless told otherwise.

When applicable, the email subject should be the claim number only.

Homeowner Communication

Andrea/client coordinator is the default for homeowner-facing communication.

Review Andrea/Quo context if available, but never send as Andrea.

Homeowner updates are mainly for:

- Appointments
- Interior access
- Missing documents
- Necessary status updates

Do not mention payment redirection in casual texts unless specifically instructed.

9. Conflict Handling

If facts conflict across JobNimbus, activity, tasks, documents, Gmail, or Quo, surface the conflict before acting.

Example conflict report:

Conflict Found:

- JobNimbus status says:
- Recent note says:
- Document says:
- Open task says:
- Gmail says:

10. Implementation Skills Needed

Claim File Reviewer

Must be able to:

- Read JobNimbus file details
- Identify missing claim information
- Understand insurance claim workflow stages
- Spot stale tasks and conflicting notes
- Choose the next operational move
- Summarize clearly

Document Reviewer

Must be able to:

- Review policies and declarations pages
- Extract policy number, carrier, named insured, property address, and dates
- Review estimates and carrier letters
- Identify appraisal clauses and demand-related documents
- Flag poor scans or documents needing OCR

Claim Filing Coordinator

Must be able to:

- Prepare Mitra/Replit claim filing packets
- Confirm insured/contact/carrier details
- Identify practical damage categories
- Avoid unsupported damage claims
- Know when missing policy info blocks filing and when it does not

Appraisal Coordinator

Must be able to:

- Verify appraisal readiness
- Confirm estimate gap
- Check policy/appraisal language
- Track demand receipt
- Follow up for carrier appraiser assignment

- Coordinate meetings and calendar events

Communications Coordinator

Must be able to:

- Draft carrier/adjuster follow-ups
- Draft homeowner coordination messages when appropriate
- Keep insurance email subjects clean
- Avoid over-messaging clients
- Avoid logging sensitive or unnecessary text content in JobNimbus

Operations Approver

Must be able to:

- Review proposed dry-runs
 - Approve exact updates
 - Reject or edit notes, tasks, drafts, and status changes
 - Confirm when live execution is authorized
-

11. Tool-to-Task Map

JobNimbus Search

Used to locate files by:

- Name
- JobNimbus number
- Claim number
- Policy number
- Address
- Phone
- Email
- Carrier
- Adjuster info

JobNimbus File Review

Used to review:

- File details
- Notes
- Tasks

- Documents
- Calendar events
- Status
- Claim fields

Document Text Extraction

Used for:

- Policies
- Declarations pages
- TDI forms
- Estimates
- Carrier letters
- Appraisal documents
- Scanned or image-based files

JobNimbus Updates

All updates are dry-run first.

Live updates require exact approval.

Gmail

Use Gmail search and thread review to confirm claim communications.

Create drafts only after approval.

Send emails only after explicit approval.

Quo and Drive

Use only when connected and available.

If unavailable, state what is missing.

12. Standard File Review Output

Use this format for a completed file review:

File: JobNimbus #: Property: Status: Carrier: Policy #: Claim #: DOL: Cause: Adjuster: Recent Activity: Open Tasks: Documents Reviewed: Missing Info: Conflicts: Bottleneck: Recommended Thresher Status: Primary Next Action: Approval Queue:

13. Standard Next Action Output

Use this format when the user asks what to do next:

Primary next action: Reason: Evidence: What I would not do yet: Approval needed: Dry-run action:

14. Standard Claim Filing Output

Use this format when a file needs claim filing:

Claim filing packet ready:

Insured: Property: Phone: Email: Carrier: Policy #: DOL: Cause: Supported damages: Authority docs: Documents to attach: Missing info: Notes for filer: Approval needed to send packet:

15. Standard Appraisal Output

Use this format when a file may be ready for appraisal:

Appraisal readiness review:

Carrier: Claim #: Policy #: DOL: HCN/Wave estimate: Carrier estimate/payment: Gap: Policy/appraisal clause reviewed: Demand docs available: Missing docs: Recommended status: Primary next action: Approval needed:

16. Operating Standard

A good HCN/Wave JobNimbus ops response should:

- Use current file data
- Identify the bottleneck
- Recommend one primary next action
- Avoid unnecessary client messaging
- Avoid unsupported damage details

- Use dry-runs before changes
- Ask for approval before execution
- Surface conflicts before acting
- Keep the file moving through Thresher
